**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 15 December 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the newly introduced limitation of independent claims 1,12,31,37,50,53: "the position coding pattern codes an area of unique, continuous positions in two dimensions and said area is incapable of being encoded in its entirety by the position coding pattern on any single base" and new claims 58-63: "the position coding pattern codes a second area of unique, continuous positions and said second area is incapable of being encoded in its entirety by the position coding pattern on any single base" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Notice, that Figure 5 discloses subregions 210-213 which are not continuous and has a particular size (page 53, 3<sup>rd</sup> paragraph of the Description).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Art Unit: 2629

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:

The newly introduced limitation of independent claims 1,12,31,37,50,53: "the position coding pattern codes an area of unique, continuous positions in two dimensions and said area is incapable of being encoded in its entirety by the position coding pattern on any single base" and new claims 58-63: "the position coding pattern codes a second area of unique, continuous positions and said second area is incapable of being encoded in its entirety by the position coding pattern on any single base" are not described in the Specification.

Notice, that Figure 5 discloses subregions 210-213 which are not continuous and has a particular size (page 53, 3<sup>rd</sup> paragraph of the Description).

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

Art Unit: 2629

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-21,31-40,50,53-63 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention:

The newly introduced limitation of independent claims 1,12,31,37,50,53: "the position coding pattern codes an area of unique, continuous positions in two dimensions and said area is incapable of being encoded in its entirety by the position coding pattern on any single base" and new claims 58-63: "the position coding pattern codes a second area of unique, continuous positions and said second area is incapable of being encoded in its entirety by the position coding pattern on any single base" are not described in the Specification or shown in Figures.

Notice, that Figure 5 discloses subregions 210-213 which are not continuous and has a particular size (page 53, 3<sup>rd</sup> paragraph of the Description).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-21,31-40,50,53-63 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2629

It is not clear how hierarchical organization could be interpreted as continuous (Figure 5, items 210-213) which are not continuous and have a particular size (page 53, 3<sup>rd</sup> paragraph of the Description)?

Due to new matter situation and indefinite subject matter rejection on merits is not provided.

### ***Telephone Inquire***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leonid Shapiro whose telephone number is 571-272-7683. The examiner can normally be reached on 8 a.m. to 5 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Hjerpe can be reached on 571-272-7691. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
